Adapting to Climate Change in the Northeast: Water Quantity and Quality Challenges for Agricultural and Natural Systems

USDA Beltsville Agricultural Research Center Campus, Maryland
March 23-24, 2011

Purpose: To catalyze and facilitate multi-disciplinary and multi-institutional research groups to form and develop new regional initiatives.

Expected Outcomes:

- New resources to support research and education in NE identified and secured
- Increased trans-disciplinary, inter-institutional collaboration
- A network of experts that will continue to communicate even after the Forum to work on proposal/projects and other cooperative initiatives
- Specific areas of potential collaboration identified
- Potential teams for regional grant proposals be formed
