

From Lyla on Western region

inside site for Directors and their assistants. Lots of archived info. Some areas are password protected such as meeting minutes and handouts, and a section for the ED that includes contracts, evaluations, etc. It is primarily a place to archive information and is a central location that we all use to find info related to WEDA past and present, meeting registration info for the future, committee work, and quick links to regional and national organizations and agencies.

From Robin North Central

It's probably most used around time of our annual regional conference (because it a place where we post meeting materials like logic models and banner outcome information that has been developed by the Program Area groups). There is a part of the site that is password protected.

Use outside contractor

What directors said in 2011

“the purpose of this site is to serve as an information source for members, to promote multi-state programming (List Exp. Station integrated Ext. and research projects, multi state projects, events, conf., etc.), and to inform others interested...” Is there value in posting member institutions Impact Statements posted at Ag is America?

They all seem to contain:

- Mission & rules of operation
- Regional info – states included – maybe a map with links to institutions definitely link to NE institutions
- Directory of directors/administrators and additional staff through admin assistants consider adding: regional organizations (SARE, NE IPM & Rural Development Centers)
- Calendars
- Reports
- National Links that would be useful
- One has pass word protected page and I believe it houses their meeting agendas, minutes, appointment charts, etc. that is not open to the public. Agree with this approach
- ?Tool Box – professional development, measuring Excellence in Ext. (consider posting the 2 pager on each state)

Other regions either not using Google Analytics or planning to implement
